

Shop-Trak™

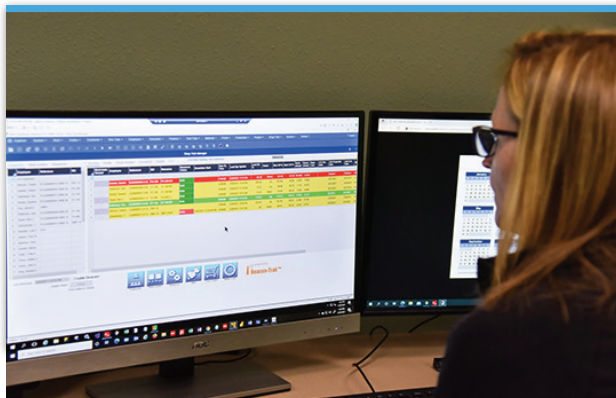

Shop Floor Execution and Time & Attendance

Achieve higher quality

Top manufacturers have a new secret weapon—Manufacturing Execution Systems (MES). Because true quality management demands quality execution, old-fashioned punch clocks and paper-based schedules simply can't keep a modern manufacturing workforce, such as yours, operating at peak efficiency. But improving efficiency is only the first step—you need full interoperability with all business applications to truly deliver rich, real-time communications between your shop floor and the rest of your enterprise. This ensures your sales, finance, design, management, and operations departments work with the same goals in mind at all times.

Advance to top technology

Benefit from decades of manufacturing expertise at The Lake Companies to make your entire enterprise more productive every day. Shop-Trak enhances the comprehensive power of SyteLine by adding a full suite of manufacturing execution systems to deliver better results to every corner of your business. By creating a constant communication stream throughout your company, you continuously position your employees to take the corrective and preventive actions that lead to top quality and peak performance.

Achieve world-class manufacturing execution and improve labor, inventory, and equipment productivity with Shop-Trak

Focus on improvement

Shop-Trak automates your entire range of shop floor workforce administration and execution tasks. You get more done with less effort at a lower cost by adding a powerful set of features to the SyteLine solution you already have.

Production Execution—Accelerate production throughout your organization using:

- Job moves and completes
- JIT transactions
- eKanban replenishments for internally-sourced and externally-sourced parts and components
- Rules-based, user defined labels formatted specifically to individual customer or product requirements
- Material Issues to production from multiple locations at once

Production status and work dispatching—Show workers real-time dispatch information for any work center or machine, in a personalized format every employee can easily understand.

- Real-time production schedules and priorities go directly to the shop
- Check production status by drilling through to transactional data

Time and attendance with labor collection –

Streamline your full range of manufacturing tasks enabling you to:

- Achieve flawless accounting of payroll and job costing while starting or ending any number of machines at any time with Shop-Trak's simultaneous multiple machine management
- Allow one employee to process multiple jobs on a single machine simultaneously or in rapid succession. Sophisticated cost allocations give you perfect precision and optimal productivity.
- Take advantage of Shop-Trak's support for work center teams or crews, allowing one person to reassign a dynamically-sized team from one job to another
- Automatically reconcile time and attendance with shop floor labor, for better record keeping
- Push time and attendance data directly into SyteLine Payroll or ADP

You get quality at every step of your manufacturing process with Shop-Trak. With support for your current plant entry security devices, as well as touch screen simplicity, barcode printing, and data collection device support, you also gain higher quality faster at less effort.

Shop-Trak enhances the comprehensive power of SyteLine by adding a full suite of manufacturing execution systems to deliver better results to every corner of your business.
